--	--	--	--	---	---

				<ul style="list-style-type: none"> <li>Finding answers to geographical questions through data collection.</li> </ul>	
Key Knowledge	<ul style="list-style-type: none"> <li>To know the names of some countries and major cities in Europe and North and South America.</li> <li>To know the names of some of the world's most significant mountain ranges.</li> <li>To know that mountains, volcanoes and earthquakes largely occur at plate boundaries.</li> <li>To know the main types of land use.</li> <li>To know some types of settlement.</li> <li>To know the negative effects of living near a volcano.</li> <li>To know the positive effects of living near a volcano.</li> <li>To know the negative effects an earthquake</li> </ul>	<ul style="list-style-type: none"> <li>To know where North and South America are on a world map.</li> <li>To know the names of some countries and major cities in Europe and North and South America.</li> <li>To know the names of some of the world's most significant rivers.</li> <li>To know that climate zones are areas of the world with similar climates.</li> <li>To know the world's biomes.</li> <li>To know vegetation belts are areas of the world which are home to similar plant species.</li> <li>To know the name of some counties in the UK (local to your school).</li> <li>To know that countries near the Equator have</li> </ul>	<ul style="list-style-type: none"> <li>To know where North and South America are on a world map.</li> <li>To know that climate zones are areas of the world with similar climates.</li> <li>To know the world's different climate zones.</li> <li>To know that biomes are areas of the world with similar climates, vegetation and animals.</li> <li>To know the world's biomes.</li> <li>To know vegetation belts are areas of the world which are home to similar plant species.</li> <li>To know the main types of land use.</li> <li>To know that countries near the Equator have less seasonal change than those near the poles.</li> </ul>		

can have on a community.

- To know ways in which communities respond to earthquakes.
- To know the different types of mountains and volcanoes and how they are formed.
- To know that an earthquake is the intense shaking of the ground.
- To know the different types of settlement.
- To know that a natural resource is something that people can use which comes from the natural environment.
- To recognise world maps as a flattened globe.
- To know how to use various simple sampling techniques.
- To know that an annotated drawing or sketch map is hand drawn and gives a rough idea of features of an area without having to be completely accurate.

less seasonal change than those near the poles.

- To know that the Equator is a line of latitude indicating the hottest places on Earth and splitting our globe into the Northern and Southern Hemispheres.
- To know lines of latitude are invisible lines on the globe that determine how far north or south a location is from the Equator.
- To know the main types of land use.
- To know that a natural resource is something that people can use which comes from the natural environment.
- To know the threats to the rainforest both on a local and global scale.
- To recognise world maps as a flattened globe.
- To know that an OS (Ordnance survey) map is used for personal use and organisations use it for housing projects,

- To know that the Equator is a line of latitude indicating the hottest places on Earth and splitting our globe into the Northern and Southern Hemispheres.
- To know lines of longitude are invisible lines on the globe that determine how far east or west a location is from the Prime Meridian.
- To know lines of latitude are invisible lines on the globe that determine how far north or south a location is from the Equator.
- To know the Tropics of Cancer and Capricorn are lines of latitude and mark the equatorial region; the countries with the hottest climates.
- To know the Northern and Southern hemisphere are 'halves' of the Earth, above and below our Equator and

					<p>planning the natural environment and public transport for security purposes.</p> <ul style="list-style-type: none"> <li>• To know that an OS map shows human and physical features as symbols.</li> <li>• To know an enquiry-based question has an open-ended answer found by research.</li> <li>• To know what a questionnaire and an interview are.</li> <li>• To know that quantitative data involves numerical facts and figures and is often objective.</li> <li>• To know that an annotated drawing or sketch map is hand drawn and gives a rough idea of features of an area without having to be completely accurate.</li> <li>• To know that qualitative data involves opinions, thoughts and feelings and is often subjective.</li> <li>• To know what a bar chart, pictogram and</li> </ul>		<p>have alternate seasons to each other.</p> <ul style="list-style-type: none"> <li>• To know that the hottest biomes are found between the Tropics of Cancer and Capricorn.</li> <li>• To know that climates can influence the foods able to grow.</li> <li>• To know that a natural resource is something that people can use which comes from the natural environment.</li> <li>• To know that fair trading is the process of ensuring workers are paid a fair price, have safe working conditions and are treated with respect and equality.</li> <li>• To know the UK grows food locally and imports food from other countries.</li> <li>• To know that grid references help us locate a particular square on a map.</li> <li>• To know an enquiry-based question has an open-ended answer found by research.</li> </ul>
--	--	--	--	--	---	--	---

table are and when to use which one best to represent data.

- To know what a questionnaire and an interview are.
- To know that quantitative data involves numerical facts and figures and is often objective.
- To know that qualitative data involves opinions, thoughts and feelings and is often subjective.

## Pottery Primary School: Subject Long-Term Plan: Geography

Cycle: B LKS2

LKS2	Year 3/4 Strand	Autumn 1	Autumn 2 Who lives in Antarctica?	Spring 1	Spring 2 Are all settlements the same?	Summer 1	Summer 2 What are rivers and how are they used?
	Key Skills		<ul style="list-style-type: none"> <li>Locating some countries in Europe and North and South America using maps.</li> <li>Locating key physical features in countries studied including significant environmental regions.</li> <li>Locating some key human features in countries studied.</li> <li>Finding the position of the Equator and describing how this impacts our environmental regions.</li> <li>Finding lines of latitude and longitude on a globe and explaining why these are important.</li> </ul>		<ul style="list-style-type: none"> <li>Locating some major cities of the countries studied.</li> <li>Locating key physical features in countries studied including significant environmental regions.</li> <li>Locating some key human features in countries studied.</li> <li>Locating some counties in the UK (local to your school).</li> <li>Locating some cities in the UK (local to your school).</li> <li>Beginning to locate the twelve geographical regions of the UK.</li> </ul>		<ul style="list-style-type: none"> <li>Locating some countries in Europe and North and South America using maps.</li> <li>Locating some major cities of the countries studied.</li> <li>Locating key physical features in countries studied including significant environmental regions.</li> <li>Locating the world's most significant mountain ranges on a map and identifying any patterns.</li> <li>Locating some of the world's most significant</li> </ul>

			<ul style="list-style-type: none"> <li>• Identifying the position of the Tropics of Cancer and Capricorn and their significance.</li> <li>• Identifying the position of the Northern and Southern hemispheres and explaining how they shape our seasons.</li> <li>• Identifying the position and significance of both the Arctic and Antarctic Circle.</li> <li>• Describing and beginning to explain similarities between two regions studied.</li> <li>• Describing and beginning to explain differences between two regions studied.</li> <li>• Describing how and why humans have responded in different ways to their local environments.</li> <li>• Discussing climates and their impact on trade, land use and settlement.</li> <li>• Explaining what measures humans have taken in order to adapt to survive in cold places.</li> </ul>		<ul style="list-style-type: none"> <li>• Identifying key physical and human characteristics of counties, cities and/or geographical regions in the UK.</li> <li>• Describing how a locality has changed over time, giving examples of both physical and human features.</li> <li>• Describing and beginning to explain similarities between two regions studied.</li> <li>• Describing and beginning to explain differences between two regions studied.</li> <li>• Describing how and why humans have responded in different ways to their local environments.</li> <li>• Describing and explaining how people who live in a contrasting physical area may have different lives to people in the UK.</li> </ul>		<p>rivers and identifying any patterns.</p> <ul style="list-style-type: none"> <li>• Locating some cities in the UK (local to your school).</li> <li>• Beginning to locate the twelve geographical regions of the UK.</li> <li>• Identifying key physical and human characteristics of counties, cities and/or geographical regions in the UK.</li> <li>• Describing how and why humans have responded in different ways to their local environments.</li> <li>• Describing how physical features, such as mountains and rivers are formed, and why volcanoes and earthquakes occur.</li> <li>• Describing where volcanoes, earthquakes and mountains are located globally.</li> <li>• Describing and explaining how physical features such as rivers, mountains, volcanoes</li> </ul>

--	--	--	--	--	--	--	---

features in countries studied.

- Using the scale bar on a map to estimate distances.
- Finding countries and features of countries in an atlas using contents and index.
- Zooming in and out of a digital map.
- Accurately using 4-figure grid references to locate features on a map in regions studied.
- Beginning to locate features using the 8 points of a compass.
- Making and using a simple route on a map.
- Observing, recording, and naming geographical features in their local environments.

recognise and describe physical and human features in countries studied.

- Using the scale bar on a map to estimate distances.
- Finding countries and features of countries in an atlas using contents and index.
- Zooming in and out of a digital map.
- Beginning to use the key on an OS map to name and recognise key physical and human features in regions studied.
- Using a simple key on their own map to show an example of both physical and human features.
- Following a route on a map with some accuracy.
- Saying which directions are N, S, E, W on an OS map.
- Making and using a simple route on a map.

- Finding countries and features of countries in an atlas using contents and index.
- Zooming in and out of a digital map.
- Beginning to use the key on an OS map to name and recognise key physical and human features in regions studied.
- Accurately using 4-figure grid references to locate features on a map in regions studied.
- Beginning to locate features using the 8 points of a compass.
- Using a simple key on their own map to show an example of both physical and human features.
- Following a route on a map with some accuracy.
- Saying which directions are N, S, E, W on an OS map.
- Labelling some features on an aerial photograph and then locating these

				<ul style="list-style-type: none"><li>• Labelling some features on an aerial photograph and then locating these on an OS map of the same locality and scale in regions studied.</li><li>• Beginning to choose the best approach to answer an enquiry question.</li><li>• Mapping land use in a small local area using maps and plans.</li><li>• Asking and answering one-step and two-step geographical questions.</li><li>• Observing, recording, and naming geographical features in their local environments.</li><li>• Taking digital photos and labelling or captioning them.</li><li>• Finding answers to geographical questions through data collection.</li></ul>	<p>on an OS map of the same locality and scale in regions studied.</p> <ul style="list-style-type: none"><li>• Beginning to choose the best approach to answer an enquiry question.</li><li>• Mapping land use in a small local area using maps and plans.</li><li>• Asking and answering one-step and two-step geographical questions.</li><li>• Observing, recording, and naming geographical features in their local environments.</li><li>• Taking digital photos and labelling or captioning them.</li><li>• Making annotated sketches, field drawings and freehand maps to record observations during fieldwork.</li><li>• Beginning to use a simplified Likert Scale to record their judgements of environmental quality.</li><li>• Presenting data using plans, freehand sketch</li></ul>

							<p>maps, annotated drawings, graphs, presentations, writing and digital technologies (photos with labels/captions) when communicating geographical information.</p> <ul style="list-style-type: none"> <li>• Suggesting different ways that a locality could be changed and improved.</li> <li>• Finding answers to geographical questions through data collection.</li> </ul>
	Key Knowledge and Physical		<ul style="list-style-type: none"> <li>• To know where North and South America are on a world map.</li> <li>• To know the names of some countries and major cities in Europe and North and South America.</li> <li>• To know that climate zones are areas of the world with similar climates.</li> <li>• To know the world's different climate zones (equatorial, tropical, hot</li> </ul>		<ul style="list-style-type: none"> <li>• To know the names of some of the world's most significant rivers.</li> <li>• To know the name of some counties in the UK (local to your school).</li> <li>• To know the name of some cities in the UK (local to your school).</li> <li>• To know the name of the county that they live in and their closest city.</li> </ul>		<ul style="list-style-type: none"> <li>• To know where North and South America are on a world map.</li> <li>• To know the names of some of the world's most significant mountain ranges.</li> <li>• To know the names of some of the world's most significant rivers.</li> <li>• To know the name of some counties in the UK (local to your school).</li> </ul>

desert, temperate and polar).

- To know the world's biomes.
- To know the main types of land use.
- To know that countries near the Equator have less seasonal change than those near the poles.
- To know that the Equator is a line of latitude indicating the hottest places on Earth and splitting our globe into the Northern and Southern Hemispheres.
- To know lines of longitude are invisible lines on the globe that determine how far east or west a location is from the Prime Meridian.
- To know lines of latitude are invisible lines on the globe that determine how far north or south a location is from the Equator.
- To know the Tropics of Cancer and Capricorn are lines of latitude and mark the equatorial region; the

- To begin to name the twelve geographical regions of the UK.
- To know the main types of land use.
- To know some types of settlement.
- To know water is used by humans in a variety of ways.
- To know an urban place is somewhere near a town or city.
- To know a rural place is somewhere near the countryside.
- To know that a natural resource is something that people can use which comes from the natural environment.
- To know the UK grows food locally and imports food from other countries.
- To understand that a scale shows how much smaller a map is compared to real life.
- To know that an OS (Ordnance survey) map is used for personal use and organisations use it

- To know the name of some cities in the UK (local to your school).
- To know the name of the county that they live in and their closest city.
- To begin to name the twelve geographical regions of the UK.
- To know the main types of land use.
- To know some types of settlement.
- To know that the water cycle is the processes and stores which move water around our Earth and to be able to name these.
- To know the courses and key features of a river.
- To know the different types of mountains and volcanoes and how they are formed.
- To know water is used by humans in a variety of ways.
- To know an urban place is somewhere near a town or city.

countries with the hottest climates.

- To know the Northern and Southern hemisphere are 'halves' of the Earth, above and below our Equator and have alternate seasons to each other.
- To know the boundaries of the polar regions are marked by the invisible lines the Arctic and Antarctic circle.
- To know the patterns of daylight in the Arctic and Antarctic circle and the Equatorial regions.
- To know that the water cycle is the processes and stores which move water around our Earth and to be able to name these.
- To know that a biome is a region of the globe sharing a similar climate, landscape, vegetation and wildlife.
- To know that the hottest biomes are found between the Tropics of Cancer and Capricorn.

for housing projects, planning the natural environment and public transport and for security purposes.

- To know that an OS map shows human and physical features as symbols.
- To know the main types of land use (agricultural, residential, recreational, commercial, industrial and transportation).
- To know an enquiry-based question has an open-ended answer found by research.
- To know what a bar chart, pictogram and table are and when to use which one best to represent data.

- To know a rural place is somewhere near the countryside.
- To know that a natural resource is something that people can use which comes from the natural environment.
- To know the UK grows food locally and imports food from other countries.
- To understand that a scale shows how much smaller a map is compared to real life.
- To recognise world maps as a flattened globe.
- To know that an OS (Ordnance survey) map is used for personal use and organisations use it for housing projects, planning the natural environment and public transport and for security purposes.
- To know that an OS map shows human and physical features as symbols.

- To know the world's different climate zones.
- To know water is used by humans in a variety of ways.
- To know that a natural resource is something that people can use which comes from the natural environment.
- To understand that a scale shows how much smaller a map is compared to real life.
- To recognise world maps as a flattened globe.
- To know the eight points of a compass are north, south, east, west, north-east, south-east, north-west, south-west.
- To know that an annotated drawing or sketch map is hand drawn and gives a rough idea of features of an area without having to be completely accurate.

- To know that grid references help us locate a particular square on a map.
- To know the eight points of a compass are north, south, east, west, north-east, south-east, north-west, south-west.
- To know the main types of land use (agricultural, residential, recreational, commercial, industrial and transportation).
- To know an enquiry-based question has an open-ended answer found by research.
- To know that an annotated drawing or sketch map is hand drawn and gives a rough idea of features of an area without having to be completely accurate.
- To know a Likert scale is used to record people's feelings and attitudes.
- To know what a bar chart, pictogram and table are and when to

use which one best to represent data.
